Welcome to our home of compassionate care, love and kinship.

Deianne Sobers BSS

As an association, we seek to provide quality time, quality care, quality information and guidance to patients and their caregivers who face the challenges associated with life-threatening illnesses. We offer medical care, nursing care, social care and counselling. Patients are also referred for other care where and when necessary.

Efficiency and trust are embedded into our goals and objectives. We offer you boundless service and are here to assist and complement the existing health and social services that are available to you. In performing our tasks we will research all avenues of reliable information that will enhance our provision of care.

It is said that when you enter a room to offer palliative care you offer yourself and make a promise that should not be broken. So we offer you ourselves. In return I extend an invitation to you – come journey with us, come share and be a heart that is always full to give.
